► **Qibla Indicator**

Place: Iran

Date: 19th century

Material: Brass

Did you know that qibla compasses were of great importance as the 'qibla' (direction towards Makkah) was, and is, central to Islamic practices, such as prayer? These compasses point towards Makkah for the direction of prayers and believers should also be buried facing the qibla.

You can look at this object closer on the 2nd floor in gallery 9.
